

BATHROOM LINEAR INLETS

Aqua
Ambient

www.aquaambient-design.com

The Aqua Ambient bathroom linear inlet is a new trend of water drainage in places such as bathrooms, spas or sports facilities. Aqua Ambient linear inlets have been designed in accordance to the latest trends so that they perfectly harmonize with an architectural values of utility rooms with a high finish standard.

Quick and effective drainage of water from the floor surface and a guarantee of no water getting into the part of the bathroom not intended for the shower tray.

The stainless steel finish provides high chemical and temperature resistance. In addition, the sealing collar ensures tightness, facilitates assembly and extends durability of the waterproof layer in the floor.

A wide range of grates with lengths of 600-1000 mm, modern design and easy connection of the drain pipe (360 ° rotating siphon) allow installation in the most demanding conditions.

The built-in linear inlet creates a perfectly smooth and flat surface, enabling any arrangement of the room without creating unnecessary thresholds, divisions and barriers. Gently finished edges guarantee safe use.

NOVELTY! LOW SIPHON

360° rotating, low siphon allows installation in the most demanding conditions
