REGULATION ErP

WE ARE READY TO START

WITH HIGH-EFFICIENCY PUMPS AND AFFORDABLE PRICES

ErP Regulation (Energy related Products) translates as energy-relevant products. The objective of this Regulation, 2009/125/EC is to reduce energy consumption in accordance with the environmental requirements and it is being introduced in the EU in the field of circulation pumps in 2013. In the course of the next seven years the Regulation will be put in practice in the following three steps:

- The first step from 01/01/2013 for the energy index up to (max.) 0.27 - Part 2
- The second step from 01/08 in 2015 for the energy index up to (max.) 0.23 - Part 2
- The third step from 01/01/2020 for the energy index up to (max.) 0.23 - Part 2 – including the pumps, which are being replaced in HVAC systems

The benchmark for most efficient circulators is EEI ≤ 0,20 - Part 2.

The IMP PUMPS meet environmental requirements in accordance to ERP Regulation with high-efficiency pumps with affordable prices.

PUMP MARKINGS		NMT(D) (SAN) SMART (C) 50/100 F240
NMT	Pump type	50 Connection size (15, 20, 25, 32, 40, 50, 65, 80, 100,...)
D	Twin pump	100 Max head (in 0,1m of H ₂ O)
SAN	Bronze hydraulic casting	F Flange connection (thread connection without letter)
SMART	Model name (MAX, LAN,...)	240 Length between flanges
C	Communication	

ABBREVIATIONS & THEIR MEANINGS

1 ~	Single-phase electric current
3 ~	3 phase electric current
DIN	Deutsches Institut für Normung
DN	nominal size of the connector
Δp	pressure difference
Δp-prop	proportional pressure difference
Δp-c	constant pressure difference
Δp-v	variable differential pressure
ECM-technology	BLDC synchronous motor with permanent magnets
EEI	Energy efficiency index
ErP	Energy related products
H	Pressure in meters
IP	Motor driven protection devices against environmental influences
ISO	EU standards
KTL	Cataphoresis protection with high corrosion resistance
Modbus	The standard communication protocol
NMT	New motor technology
NMT C	New motor technology electronically controlled circulation pump with communication module
NMTD	New motor technology electronically controlled circulation pump in a double execution
NMT SAN	New motor technology High-efficiency circulating pump for domestic hot water
NMT ER	New motor technology electronically controlled circulation pump with analog signal 0 - 10 V
PN	Nominal pressure in bars
Q	Flow rate in cubic meters.
VDI-Guidelines	Guidelines of the Association of German Engineers

CONTACTS

GENERAL MANAGER

Mr. Mag. Damir Popović

e-mail: damir.popovic@imp-pumps.com

Tel: +386 1 2806 400

Fax: +386 1 2806 460

SALES MANAGER

Mr. Matjaž Kump

e-mail: matjaz.kump@imp-pumps.com

Tel: +386 1 2806 418

Fax: +386 1 2806 460

SALES OFFICE

Mrs. Martina Nartnik

e-mail: martina.nartnik@imp-pumps.com

Tel: +386 1 2806 414

Fax: +386 1 2806 460

TECHNICAL INFORMATION

Mr. Boris Petrovič

GENERAL INFORMATION

ALL PRODUCTS AND COMPONENTS ARE MANUFACTURED FROM ENVIRONMENTALLY FRIENDLY MATERIALS.

UPON DISPOSAL INTERNAL ENVIRONMENTAL REGULATION MUST BE CONSIDERED.

FURTHER INFORMATION ON ALL PUMPING PROGRAMS WITH TECHNICAL DATA ARE AVAILABLE ON
WWW.IMP-PUMPS.COM

GENERAL SALES CONDITIONS AND TERMS OF PAYMENT – DEPENDING ON THE AGREEMENT WITH THE FIRM IMP PUMPS.

IMAGES IN CATALOGUE ARE FOR ILLUSTRATIVE PURPOSES ONLY.

TECHNICAL ADJUSTMENTS AND REVISIONS ARE NOT PERMITTED.

ECO HIGH-EFFICIENCY REGULATED THREADED PUMPS NMT -/40

NMT

DESCRIPTION

Series of high efficiency wet running ECM rotor circulation pumps with permanent magnets and integrated electronic regulation with which the pumps can adapt to current needs of the system with proportional or constant pressure regulation.

- SAN option for use in domestic hot water circulating systems
- ER option with 0-10V analog input
- D option, twin pump

APPLICATIONS

Used for circulation of water or a mixture of water/glycol in hot water heating systems, air conditioning systems and circulation systems.

OPERATION

Δp -Proportional pressure control

After selecting level pump recognizes the lowest resistance of the system and automatically adjusts its own strain.

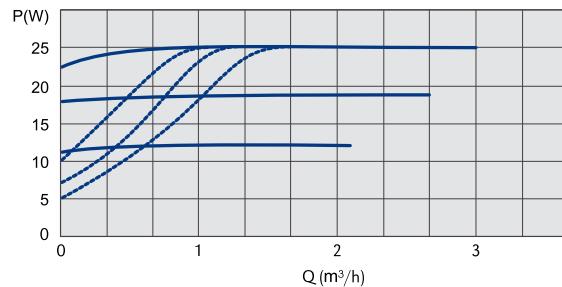

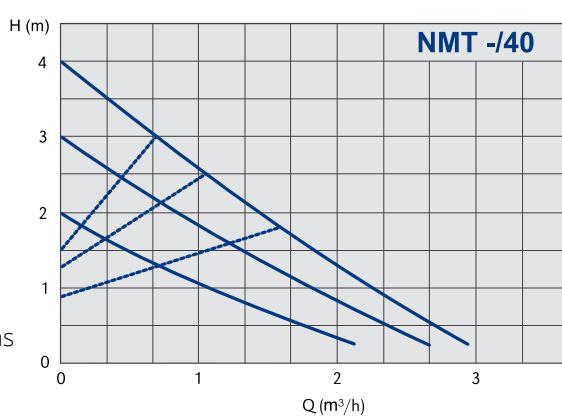

Δp -Constant speed

After selection pump works in three different speeds

PRODUCT DETAILS

- High efficiency ECM technology
- Energy savings
- Proportional pressure control
- Constant speed
- Easy handling and installation
- Robust and compact construction for long life
- Automatic venting
- Low noise operation
- Single body, which allows a variety of mounting positions
- Housing with cataphoresis

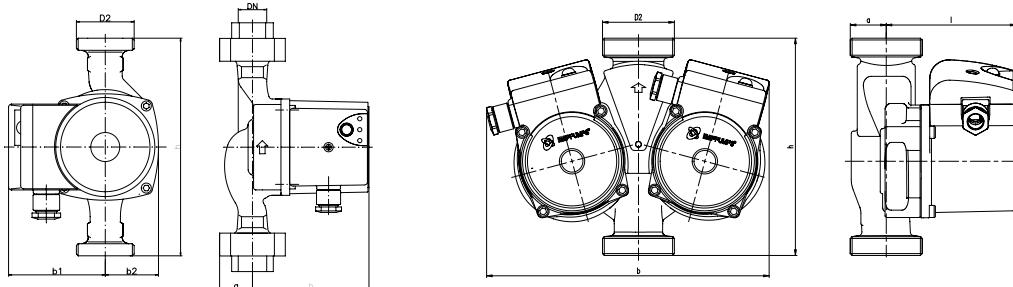

Pump component	Material

TECHNICAL DATA

Flow Q up to 2,6 m³/h

Pressure H up to 4 m

Power 5 - 25 Watt

Nominal pressure 10 bar

Permissible media

- Water, mixed with glycol, parameters must be checked in the mixture of water with over 20% of glycol
- Pure non-explosive liquid media free from mineral oils and without solid particles

Permissible temperature range

- Medium temperature from +5 °C to +95 °C (NMT SAN +5 °C to +65 °C) with max. surroundings temperature up to +40 °C

Minimum inlet pressure

0,05 bar < 75 °C Temperature of medium

0,28 bar < 90 °C Temperature of medium

Electrical connection

Voltage 1 ~ 230 V, 50/60 Hz

Motor/Electronics

- Motor with permanent magnets
- The energy index EEI ≤ 0,20 - Part 2
- Built-in motor protection
- Control Δp or constant speed
- Degree of protection: IP 44
- Insulation class F

HIGH-EFFICIENCY REGULATED THREADED PUMPS NMT SMART -/40

SMART

DESCRIPTION

Series of high efficiency wet running ECM rotor circulation pumps with permanent magnets and integrated electronic regulation with which the pumps can adapt to current needs of the system.

- D option, twin pump
- C option with communication module

APPLICATIONS

Used for circulation of water or a mixture of water/glycol in hot water heating systems, air conditioning systems and circulation systems.

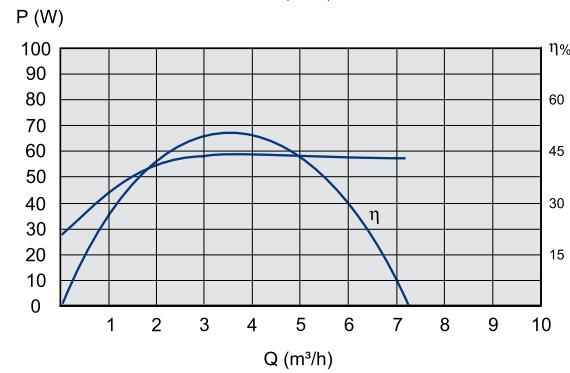

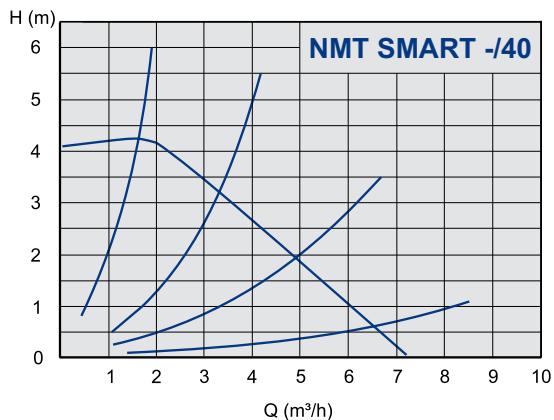

OPERATION

- Auto mode (default)
- Proportional pressure control
- Constant pressure control
- Constant speed
- Night mode

PRODUCT DETAILS

- High efficiency ECM technology
- Energy savings
- LED Display for control
- Easy handling and installation
- Plug & Play
- Robust and compact construction for long life
- Automatic venting
- Low noise operation
- Housing with cataphoresis
- NMTC communication module (optionally):
 - Ethernet connection
 - Modbus RTU connection
 - Analog Control input 0 - 10 V
 - 3 digital inputs
 - 1 relay output

PRODUCT DETAILS

- High efficiency ECM technology
- Energy savings
- LED Display for control
- Easy handling and installation
- Plug & Play
- Robust and compact construction for long life
- Automatic venting
- Low noise operation
- Housing with cataphoresis
- NMTC communication module (optionally):
 - Ethernet connection
 - Modbus RTU connection
 - Analog Control input 0 - 10 V
 - 3 digital inputs
 - 1 relay output

TECHNICAL DATA

Flow Q up to 10 m³/h

Pressure H up to 8 m

Power 7 - 140 Watt

Nominal pressure 10 bar

Permissible mediums

- Water, mixed with glycol, parameters must be checked in the mixture of water with over 20% of glycol
- Pure non-explosive liquid media free from mineral oils and without solid particles

Permissible temperature range

- Medium temperature from +2 °C to +110 °C with max. surroundings temperature up to +40 °C

Minimum inlet pressure

0,05 bar < 75 °C Temperature of medium

0,28 bar < 90 °C Temperature of medium

Electrical connection

Voltage 1 ~ 230 V, 50/60 Hz

Motor/Electronics

- Motor with permanent magnets
- The energy index EEI ≤ 0,21 - Part 2
- Built-in motor protection
- Degree of protection: IP 44
- Insulation class F

HIGH-EFFICIENCY REGULATED THREADED PUMPS NMT SMART -/100

DESCRIPTION

Series of high efficiency wet running ECM rotor circulation pumps with permanent magnets and integrated electronic regulation with which the pumps can adapt to current needs of the system.

- D option, twin pump
- C option with communication module

APPLICATIONS

Used for circulation of water or a mixture of water/glycol in hot water heating systems, air conditioning systems and circulation systems.

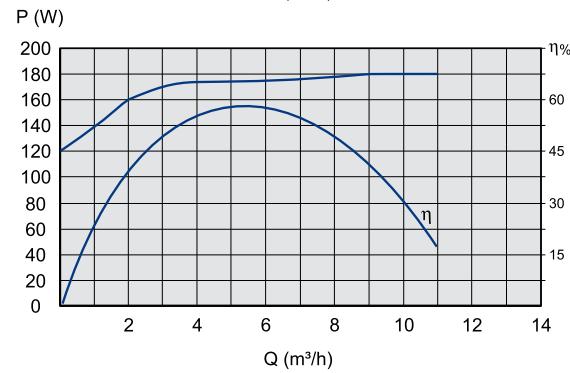

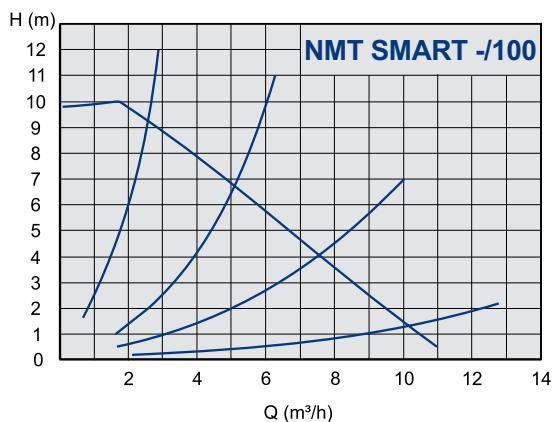

OPERATION

- Auto mode (default)
- Proportional pressure control
- Constant pressure control
- Constant speed
- Night mode

PRODUCT DETAILS

- High efficiency ECM technology
- Energy savings
- LED Display for control

HIGH-EFFICIENCY REGULATED FLANGED PUMP NMT 40F

NMT

DESCRIPTION

Series of high efficiency wet running ECM rotor circulation pumps with permanent magnets and integrated electronic regulation with which the pumps can adapt to current needs of the system. Setting the pump and overview of the current parameters via ethernet.

- SAN option for use in domestic hot water circulating systems
- D option, twin pump

APPLICATIONS

Used for circulation of water or a mixture of water/glycol in hot water heating systems, air conditioning systems and circulation systems.

OPERATION

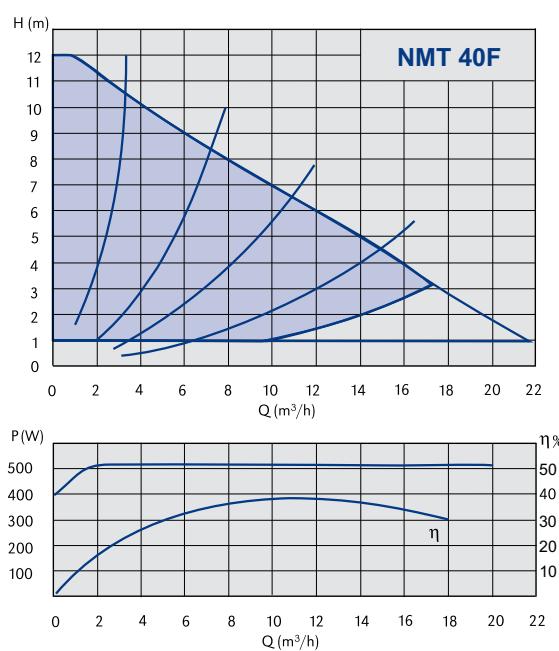

Δp -Proportional pressure control

The pump proportionally adjust the pressure, according to system resistance. Guaranteeing minimal power and energy consumptions.

PRODUCT DETAILS

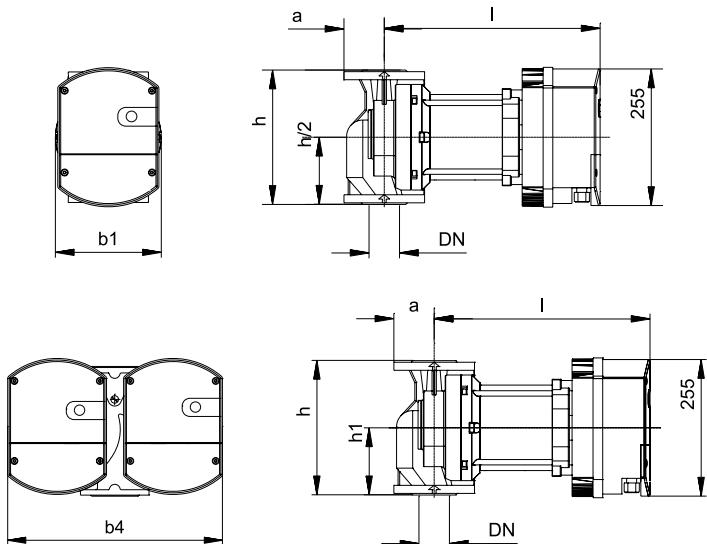

- Efficiency ECM technology
- Energy savings
- Easy handling and installation
- Robust and compact construction for long life
- Automatic venting
- Silent operation
- Housing with cataphoresis

TECHNICAL DATA

Flow Q up to 25 m³/h

Pressure H up to 12 m

Power 20 - 500 Watt

Nominal pressure PN 6/10 bar

Permissible media

- Water, mixed with glycol, parameters must be checked in the mixture of water with over 20% of glycol
- Pure non-explosive liquid media free from mineral oils and without solid particles

Permissible temperature range

- Medium temperature from -10 °C to +110 °C (NMT SAN +5 °C to +65 °C) with max. surroundings temperature up to +40 °C

Minimum inlet pressure

0,5 bar < 50 °C Temperature of medium

0,8 bar < 80 °C Temperature of medium

1,4 bar < 110 °C Temperature of medium

Electrical connection

Voltage 1 ~ 230 V, 50/60 Hz

Motor/Electronics

- Motor with permanent magnets
- The energy index EEI ≤ 0,27 - Part 2
- Built-in motor protection
- Methods of control:
 - Current control (limit current)
 - Power control (limit power)
 - Constant pressure control (Δp -c)
 - Proportional pressure control (Δp -v)
 - Option settings QH curve at fixed speeds
 - Constant speed
- Degree of protection: IP 44
- Insulation class H

HIGH-EFFICIENCY REGULATED FLANGED PUMP NMT 50F

NMT

DESCRIPTION

Series of high efficiency wet running ECM rotor circulation pumps with permanent magnets and integrated electronic regulation with which the pumps can adapt to current needs of the system. Setting the pump and overview of the current parameters via ethernet.

- SAN option for use in domestic hot water circulating systems
- D option, twin pump

APPLICATIONS

Used for circulation of water or a mixture of water/glycol in hot water heating systems, air conditioning systems and circulation systems.

OPERATION

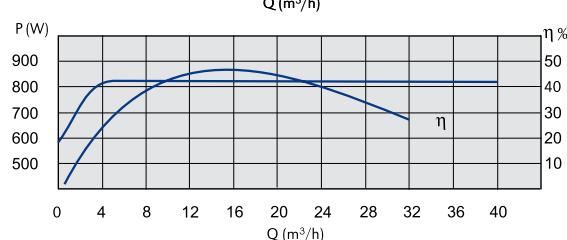

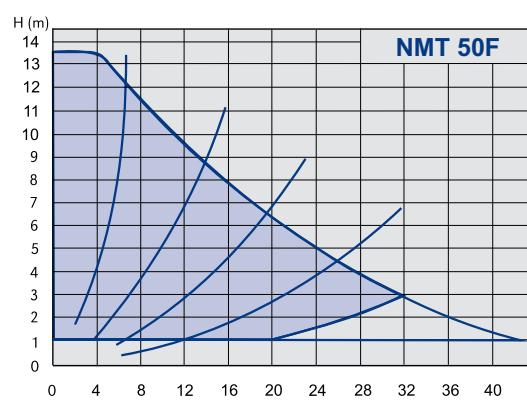

Δp -Proportional pressure control

The pump proportionally adjust the pressure, according to system resistance. Guaranteeing minimal power and energy consumptions.

PRODUCT DETAILS

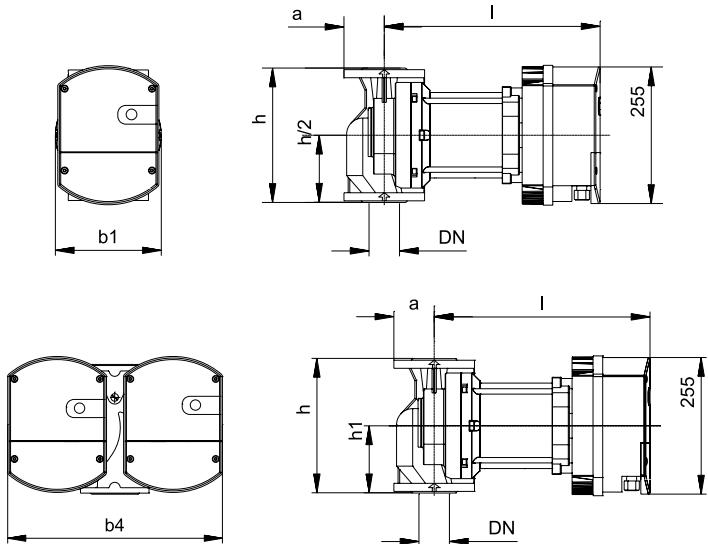

- Efficiency ECM technology
- Energy savings
- Easy handling and installation
- Robust and compact construction for long life
- Automatic venting
- Silent operation
- Housing with cataphoresis

HIGH-EFFICIENCY REGULATED FLANGED PUMP NMT LAN 40F

LAN

DESCRIPTION

Series of high efficiency wet running ECM rotor circulation pumps with permanent magnets and integrated electronic regulation with which the pumps can adapt to current needs of the system.

- SAN option for use in domestic hot water circulating systems
- D option, twin pump
- C option with communication

APPLICATIONS

Used for circulation of water or a mixture of water/glycol in hot water heating systems, air conditioning systems and circulation systems.

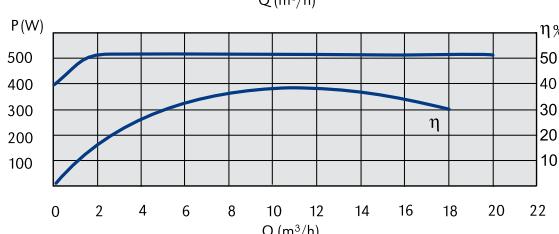

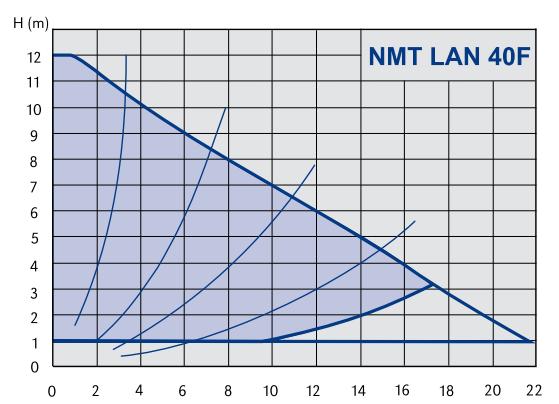

OPERATION

- Auto mode (default)
- Proportional pressure control
- Constant pressure control
- Constant speed
- Night mode

PRODUCT DETAILS

- High efficiency ECM technology
- LED Display for control
- Easy operation and simple installation
- Ethernet connection
- Housing with cataphoresis
- NMTC communication module (optionally):
 - Ethernet connection
 - Modbus RTU connection
 - Analog Control input 0 - 10 V
 - 3 digital inputs
 - 1 relay output

Motor/Electronics

- Motor with permanent magnets
- The energy index EEI ≤ 0,25 - Part 2
- Built-in motor protection
- Methods of control:
 - Current control (limit current)
 - Power control (limit power)
 - Constant pressure control (Δp -c)
 - Dp prop (Δp -v)
 - Option settings QH curve at fixed speeds
 - Constant speed
- Degree of protection: IP 44
- Insulation class H

NEW

HIGH-EFFICIENCY REGULATED FLANGED PUMP NMT LAN 65/180F

DESCRIPTION

Series of high efficiency wet running ECM rotor circulation pumps with permanent magnets and integrated electronic regulation with which the pumps can adapt to current needs of the system.

- D option, twin pump

APPLICATIONS

Used for circulation of water or a mixture of water/glycol in hot water heating systems, air conditioning systems and circulation systems.

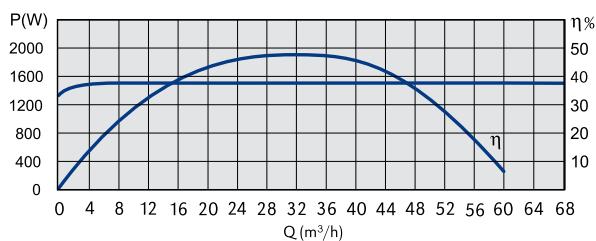

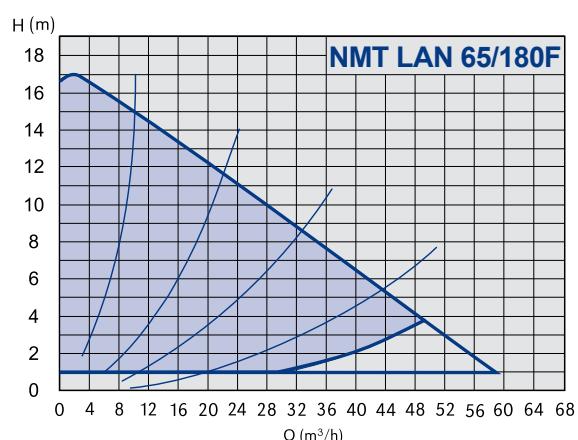

OPERATION

- Auto mode (default)
- Proportional pressure control
- Constant pressure control
- Constant speed
- Night mode

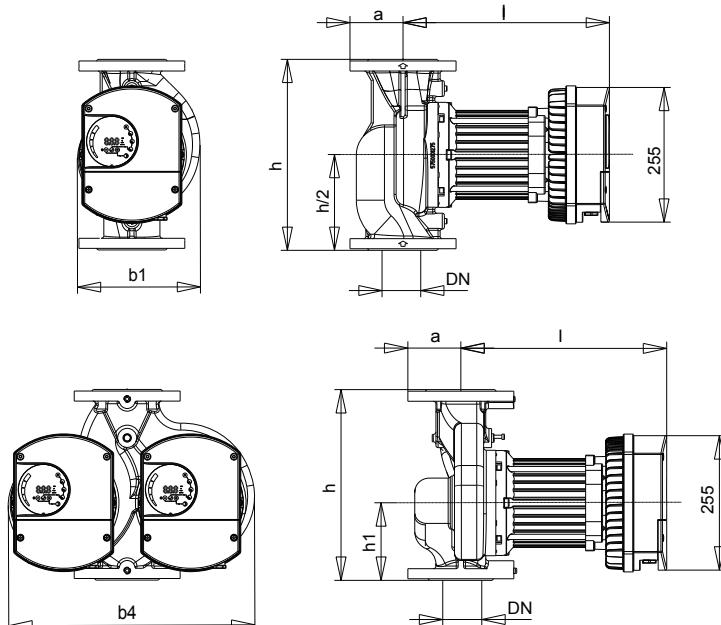

PRODUCT DETAILS

- High efficiency ECM technology
- LED Display for control
- Easy operation and simple installation
- Ethernet connection
- Housing with cataphoresis
- NMTC communication module (optionally):
 - Ethernet connection
 - Modbus RTU connection
 - Analog Control input 0 - 10 V
 - 3 digital inputs
 - 1 relay output

TECHNICAL DATA

Flow Q up to 58 m³/h
 Pressure H up to 17 m
 Power 20 - 1500 Watt
 Nominal pressure PN 6/10 bar

Permissible media

- Water, mixed with glycol, parameters must be checked in the mixture of water with over 20% of glycol
- Pure non-explosive liquid media free from mineral oils and without solid particles

Permissible temperature range

- Medium temperature from -10 °C to +110 °C with max. surroundings temperature up to +40 °C

Minimum inlet pressure

- 0,5 bar < 50 °C Temperature of medium
 0,8 bar < 80 °C Temperature of medium
 1,4 bar < 110 °C Temperature of medium

Electrical connection

Voltage 1 ~ 230 V, 50/60 Hz

HIGH-EFFICIENCY REGULATED

SAN ECO

PUMPS FOR DOMESTIC HOT WATER

DESCRIPTION

The high-efficiency, continuously, manually adjustable pump for domestic hot water, freely flowing ball axis permanent magnet motor and ECM technology.

APPLICATIONS

Domestic hot water circulating systems. ECO SAN pumps comply with the requirements for use in domestic hot water circulating systems and form a systemic protection against legionella.

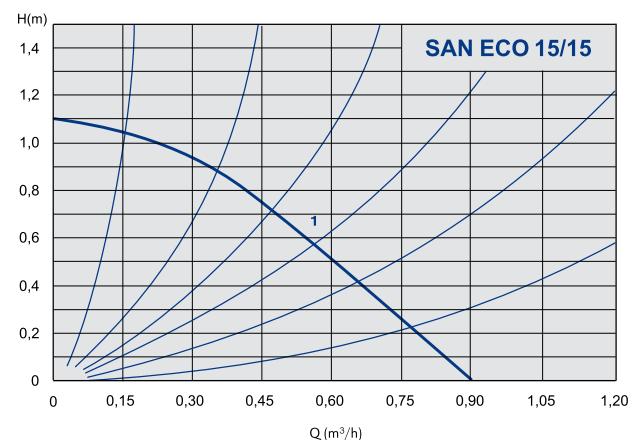

OPERATION

The pump automatically adjust the pressure, according to system resistance. The timer installation is possible for selecting the starting time of the operation and adjusting the thermostat.

PRODUCT DETAILS

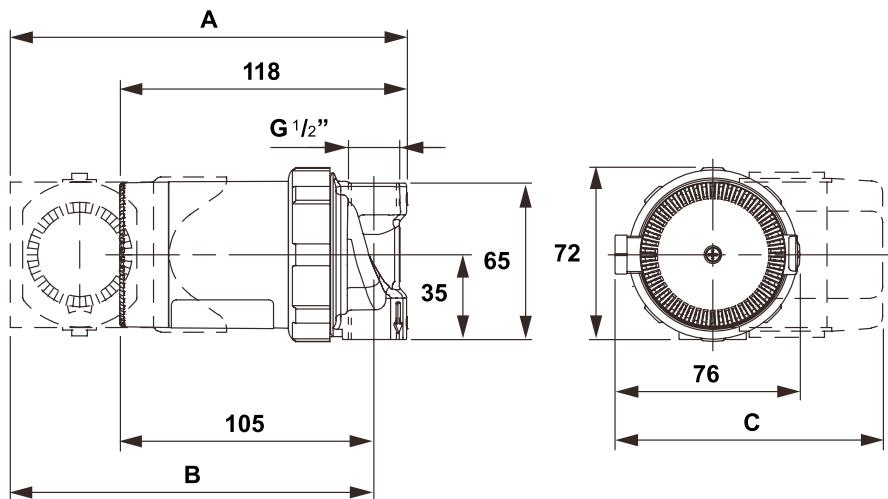

- The high efficiency of the ECM technology
- Energy savings
- 4 possible performances
 - B version with bronze housing
 - BU version with bronze housing and timer
 - BTU model with bronze housing, thermostat and timer
 - GT version with bronze housing and thermostat
- Easy handling and installation
- Robust and compact construction for long life
- Specially adapted to the independence of lime scale
- Easy to use and small

Pump component	Material
Housing	Bronze
Ceramic bearings	Ceramics
Rotor impeler	polyamide

15/15 BT	65 mm	15	163	150	110
15/15 BTU	65 mm	15	163	150	110

TECHNICAL DATA

Flow Q up to 0,9 m³/h

Pressure H up to 1,1 m

Power 2 - 8 Watt

Nominal pressure 10 bar

Permissible mediums

- Water, mixed with glycol, parameters must be checked in the mixture of water with over 20% of glycol
- Pure non-explosive liquid media free from mineral oils and without solid particles

Permissible temperature range

- Medium temperature from +5 °C to +95 °C

Minimum inlet pressure

0,05 bar < 75 °C Temperature of medium

0,28 bar < 90 °C Temperature of medium

Electrical connection

Voltage 1 ~ 230 V, 50/60 Hz

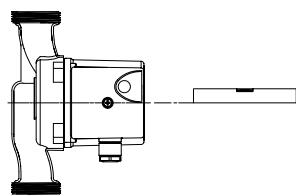

Motor/Electronics

- Maximum power 8 W
- Shaftless spherical motor with ECM technology
- Protection IP 44
- Insulation class F
- Optional with thermostat for temperature range 20-70 °C
- Optional timer

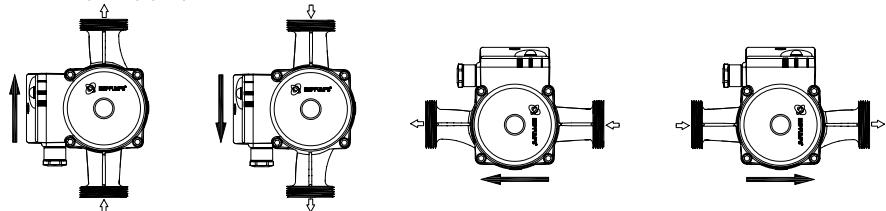

INSTALLATION

After installing the pump, the motor shafts have to remain in horizontal position.
